1150 King Georges Post Rd, Edison, NJ 08837-3729, Tel: 800.782.7636

## March 22, 2010 SM-S200 and SM-T300 Portable Printers

Star Micronics is proud to add Portable Receipt Printers to its long roster of point of service printers. The first two portable printers now available from Star are the SM-S200 and the SM-T300.

The **SM-S200** is a 2-inch wide portable printer designed to assist and empower mobile and field service industry users who require a small and light (300g - including battery and paper) portable printer to “get the job done.”

The SM-S200 is ideal for the hospitality “table-side” order taking as well as retail “line busting” as its sleek design fit in a customer friendly environment. In addition to easy drop in & print paper loading and print speed of 80mm per second, the SM-S200 features an LCD display, magnetic stripe reader and comes standard with Serial and Bluetooth connection.

Included with the printer is:

- Battery Pack
- AC Battery Charger
- Sample Paper Roll
- Serial Cable

Dust protected and splash-resistant (IP54 Certified), the **SM-T300** is ideal for outside field workers requiring handhelds to seamlessly print to a durable portable printer. Its’ rugged and splash proof design coupled with a long battery life makes the SM-T300 a welcomed option for applications in harsh outdoor environments, such as service & delivery, public safety and utilities.

In addition to easy drop in & print paper loading and a print speed of 80mm per second, the SM-T300 also features an LCD display, magnetic stripe reader and comes standard with Serial and Bluetooth connections.

Included with the printer is:

- AC Charger
- Belt Clip
- Battery Pack
- Sample Paper Roll
- Serial Cable

Please visit <http://www.starmicronics.com/Supports/DriverBrochure.aspx> to download product user guide, program guide, application notes and the SDK for the portable printers. The SDK will expose the familiar StarIO API over all the most popular mobile platforms and programming languages to allow a developer to easily design mobile applications to communicate with any Star Micronics printer providing support for printing, reading the MSR and printer status.

The SM-S200 and the SM-T300 come with a 1-year limited warranty and are FCC (Federal Communications Commission) certified.
