Subject: TSP700II Thermal Printer Product Announcement

In continuing with its *Always-Leading-Always Innovating* corporate philosophy, Star Micronics America is proud to announce the release of its latest thermal printer, the TSP700II, which is replacing the TSP700.

After the enormous success and popularity of the TSP700, originally released in 2001, which delivered, at the time, one of the fastest multi-function printers on the market, Star Micronics has decided to further enhance and even exceed one of its top selling printers. The TSP700II is the fastest single station printer on the market today. With a print speed of 53RPM (receipts per minute) (250mm/second) as well as *futurePRNT* software tools, the TSP700II leads the industry in POS printer specs.

With improved head reliability design and print resolution, this printer offers exceptional print quality. In addition, Star has modified the overall design of the printer to incorporate a re-designed splash proof cover that impedes any possible intrusion of dust or liquids.

The TSP700II ships complete with interface cover, wall mount and operation kit with rollers and paper support for vertical mount, power switch cover, starter roll of paper and a CD that features drivers and *futurePRNT software*. Due to these advances and additions, the price structure has been adjusted to reflect these many enhancements. Please contact your Star Champion for pricing verification.

In addition, the TSP700II comes with Star's industry leading "Extend-A-Star" bumper to bumper warranty included at no charge. Coverage term is based on standard warranty terms for your territory (i.e. three years bumper to bumper for the U.S. and Canada; two years bumper to bumper for Mexico and two years on parts for Latin America.)

The TSP700II is ideal for high-volume retail establishments, healthcare, banking, and restaurants.

## Quick Comparison

	TSP700	TSP700II
<b>Included in Printer Package:</b>		
Driver CD	No	Yes
Interface cover	No	Yes
Switch cover	Yes	Yes
Wall Mount bracket (printer side)	No	No
Power Supply	No	No
Cables	No	No/yes (Y cable with Powered USB)
Vista and XP WHQL	No	Yes
