Star Micronics Introduces the new TSP100III Thermal Printer with Bluetooth Connectivity

Star Micronics presents the third interface to the TSP100III series, the TSP100III Bluetooth

Somerset, NJ – June 28, 2016 – [Star Micronics](#), leading provider of point of sale and proof of transaction technology, is proud to introduce the newest addition to the [TSP100III series](#), the TSP100III Bi. Already offered with a LAN or WLAN interface, Star Micronics TSP100III is now offered with Bluetooth connectivity for a simple set-up and integration. The easy Bluetooth pairing connection makes the set-up as easy as ever before.

With included internal power supply, power cables, complete mounting kits, and paper roll, the TSP100III Bi is the perfect printer for any mPOS bundle. Star has also added an additional USB type A connector to power your tablet or mobile device. The TSP100III Bi offers a small form factor for any sized counter-space and prints up to twice the speed of its previous model at 43 receipts per minute. The high-speed, thermal printer also includes a guillotine auto-cutter and “drop-in & print” paper loading for even the busiest of retail and restaurant environments.

Combined with its powerful futurePRNT Windows software, users can enhance their printed receipts to add graphics (logos and coupons), print multiple copies, or use the text processing function to replace printed information or trigger a coupon, and much, much more. The TSP100III can also be seamlessly integrated with Star Micronics AllReceipts™ digital receipt application, allowing customers to manage their receipts digitally, and retailers to receive instant feedback on customer satisfaction.

About Star Micronics

Star Micronics, one of the world’s largest POS providers, has designated a portfolio of printing, secure cash management, and customer solutions for any retail or hospitality establishment in POS and mPOS environments. Embracing the mobility wave, Star’s complementary SDKs allow users to utilize Star printers in tandem with Android™, iOS iPad® and iPhone® devices to generate receipts for all of its printers. Always leading and always innovating, Star Micronics enables web-based printing solutions including remote cloud printing, wireless cash drawer solutions, proximity-based printing, and secure cash management.
