Star Micronics Introduces the New TSP100IIILAN, Thermal POS Receipt Printer

Star Micronics releases the second version of the TSP100III series with LAN interface connectivity

Somerset, NJ – May 20, 2016 – Star Micronics, a leading provider of point of sale and proof of transaction technology today announced the release of the newest addition to the TSP100III series, the TSP100IIILAN printer. The new thermal receipt printer is an upgrade of the TSP100 LAN, printing at almost twice the speed with special receipt de-curl function, and including a variety of other attractive features. The printer is fully compatible with its previous version, requiring no additional integration or development. The TSP100IIILAN is offered with wired LAN connectivity and all the necessary tools and cables, making the set-up as easy as ever before, right out of the box

With included internal power supply, Ethernet cable, wall mount kit, and paper roll, the TSP100IIILAN is the perfect printer for any POS bundle. Star has also added an additional USB type A connector to conveniently power your tablet or mobile device. The TSP100IIILAN offers a small form factor for any sized counter-space and prints up to 43 receipts per minute. The high-speed thermal receipt printer also includes a guillotine auto-cutter and “drop-in & print” paper loading for even the busiest of retail and hospitality environments.

Combined with its powerful futurePRNT Windows software, users can enhance their printed receipts to add graphics (logos and coupons), multiple copies, or use the text processing function to replace printed information or trigger a coupon, and much, much more. The TSP100IIILAN is compatible with iOS, Android, and Windows operating systems, and is also provided with a special mobile application and StarPRNT SDK, making the integration that much easier for POS application developers and integrators. The TSP100IIILAN is also compatible with Star’s AllReceipts™ digital receipt solution app, allowing customers to manage their receipt digitally, and retailers to receive instant feedback on customer satisfaction.

“The TSP100III series is Star’s newest upgrade of its worldwide recognized TSP100 series, making it an even faster, easier and better POS printer,” says Mike Hanson, Executive VP of Star Micronics. “We are very excited to announce this new product that we believe will make a huge impact on the POS industry. With a variety of interfaces, high-speed printing, and easy set-up, it is the perfect thermal printer for any POS application.”

About Star Micronics

Star Micronics, one of the world's largest POS providers, has designated a portfolio of printing, secure cash management, and customer solutions for any retail or hospitality establishment in POS and mPOS environments. Embracing the mobility wave, Star's complementary SDKs allow users to utilize Star printers in tandem with Android™, and iOS iPad® and iPhone® devices to generate receipts for all of its printers. Always leading, and always innovating, Star Micronics enables web-based printing solutions including remote cloud printing, wireless cash drawer solutions, proximity-based printing, and secure cash management.
