Star Micronics Introduces the TSP100III, the Faster, Better, and Easier POS Receipt Printer

Star Micronics releases the TSP100III, high-speed thermal receipt printer

Somerset, NJ – February 9, 2016 – Continuing its philosophy of ‘Always Leading – Always Innovating,’ [Star Micronics](#) presents the [TSP100III](#) the faster, better, and easier POS printing solution. Already a leading player in the mPOS market, Star Micronics TSP100III is now offered with WLAN connectivity, supporting 802.11b/g/n with 2.4GHz, for an easy-to-use and ready-to-go installation. The “Push ‘n’ Connect” WPS easy connection makes the wireless set-up the simplest in the industry.

With included internal power supply, power cables, complete mounting kits, and paper roll, the TSP100III is the perfect printer for any mPOS bundle. Star has also added an additional USB type A connector to power your tablet or mobile device. The TSP100III offers a small form factor for any sized counter-space and prints up to twice the speed of its previous model at 43 receipts per minute. The high-speed, thermal printer also includes a guillotine auto-cutter and “drop-in & print” paper loading for even the busiest of retail and restaurant environments.

Combined with its powerful futurePRNT Windows software, users can enhance their printer receipts to add graphics (logos and coupons), multiple copies, or use the text processing function to replace printed information or trigger a coupon, and much, much more. The TSP100III can also be seamlessly integrated with Star Micronics [AllReceipts™](#) digital receipt application, allowing customers to manage their receipts digitally, and retailers to receive instant feedback on customer satisfaction.

For additional information, please visit the Star Micronics TSP100III [webpage](#).

About Star Micronics

Star Micronics, one of the world’s largest POS providers, has designated a portfolio of printing, secure cash management, and customer engagement solutions for any retail or hospitality establishment in POS and mPOS environments. Embracing the mobility wave, Star’s complementary SDKs allow users to utilize Star printers in tandem with Android™, iOS iPad®, and iPhone® devices to generate receipts for all of its printers. Always leading, and always innovating, Star Micronics enables web-based printing solutions including remote cloud printing, wireless cash drawer solutions, proximity-based printing, and secure cash management.
