

Major Update of Star Micronics' SDK!

StarIO SDK

star **PRNT** SDK V5.0 for iOS

To Download: <http://www.starmicronics.com/support/sdkdocumentation.aspx>

Advantages

1. Swift Support, the latest programming language for iOS
2. New API Support (e.g. The program can be shortened from 200 lines to 5 lines!)
3. AllReceiptsTM support, The safe and reliable digital receipt solution

- ✓ The new "StarPRNT" SDK offers interface-independent I/O (Input/Output), a great advantage for easily controlling various Star interface models.
- ✓ No need to worry about choosing an emulation. This new API realises "emulation free" development for Star printers.
- ✓ While keeping advantages of the StarIO SDK, the StarPRNT SDK has integrated the 3 existing packages into one to improve usability.
- ✓ Star Micronics supports both "rich sample codes" for flexible application development, and "new API" for easier application development.

Contents of the package:

star **PRNT** SDK
for iOS V5.0

www.allreceipts.com/
AllReceipts
