

WebPRNT Browser Enables Printing from Web-Based Applications to Star's Bluetooth Printers

Star Micronics releases its WebPRNT Browser to extend Star's WebPRNT technology for web-based receipt printing to customers using Star's portable and desktop Bluetooth receipt printers in a mobile environment for iOS and Android operating systems. To begin, configure Star's WebPRNT Browser to open the desired web-based application which supports WebPRNT and print to the desired Bluetooth printer.

Once configured, the user simply pairs their mobile device to a Star Bluetooth printer, opens the application on Star's WebPRNT Browser and prints from the application. Easy to set up for both application developers and end users, Star's WebPRNT Browser combines the utility of WebPRNT's web-based receipt printing technology with the simplicity of Bluetooth connectivity.

Star WebPRNT Browser is offered in a free version which offers a Star branded receipt as well as a premium version which offers a fully customizable receipt. The premium version will have a one-time flat rate fee per download. Supporting all Star Micronics Bluetooth printers, Star WebPRNT Browser is available for iOS and Android, on the App store on iTunes and Google play.
